

SMART User Stories

Name – Ritesh Jha

Date – 27/06/2026

Primary User – Citizens

User Story 1

As a citizen, I want to submit a complaint with all the required details, **so that** the concerned department can understand the issue and start working on it without asking me for more information.

User Story 2

As a citizen, I want to check the status of my complaint at any time, **so that** I know whether any action has been taken.

User Story 3

As a citizen, I want to receive notifications whenever there is an update on my complaint, **so that** I don't have to keep checking the system repeatedly.

User Story 4

As a citizen, I want my complaint to reach the correct department automatically, **so that** I don't have to guess which office is responsible for resolving it.

User Story 5

As a citizen, I want to know which department is currently handling my complaint, **so that** I know who is responsible for resolving my issue.

User Story 6

As a citizen, I want to see if a similar complaint has already been reported in my area, **so that** I can avoid submitting the same issue again.

User Story 7

As a citizen, I want to know the expected time required to resolve my complaint, **so that** I have a clear expectation of when the issue may be fixed.

User Story 8

As a citizen, I want to view all the complaints I have submitted in one place, **so that** I can easily keep track of their progress and past requests.

Secondary User – Authorities

User Story 9

As an authority officer, I want every complaint to contain complete information such as location, description and supporting evidence, **so that** I can begin resolving it without unnecessary delays.

User Story 10

As an authority officer, I want newly submitted complaints to be assigned automatically based on their category and location, **so that** they reach the appropriate team quickly.

User Story 11

As an authority officer, I want to update the status of a complaint whenever work progresses, **so that** citizens remain informed throughout the resolution process.

User Story 12

As an authority officer, I want to manage all complaints through a single dashboard, **so that** I can monitor pending, ongoing and completed complaints efficiently.

User Story 13

As an authority officer, I want the system to identify duplicate complaints, **so that** I can avoid spending time on multiple records for the same issue.

User Story 14

As an authority officer, I want to search and filter complaints based on location, category, or status, **so that** I can quickly find the cases I need to work on.

User Story 15

As an authority officer, I want to maintain a record of all actions taken on each complaint, **so that** the complete history is available whenever needed.

Tertiary User – Department Head / Supervisor

User Story 16

As a department head, I want to monitor the progress of complaints handled by my team, **so that** I can ensure issues are resolved on time.

User Story 17

As a department head, I want overdue complaints to be highlighted automatically, **so that** I can take immediate action before delays become serious.

User Story 18

As a department head, I want unresolved complaints to be escalated after a defined period, **so that** important issues are not overlooked.

User Story 19

As a department head, I want to view reports showing complaint volumes and resolution performance, **so that** I can identify areas that require improvement.

User Story 20

As a department head, I want to distribute complaints among officers based on their workload, **so that** work is shared fairly and complaints are resolved more efficiently.

Tertiary User – System Administrator

User Story 21

As a system administrator, I want to create and manage user accounts for citizens and officials, **so that** only authorized users can access the system.

User Story 22

As a system administrator, I want to manage departments and complaint categories, **so that** complaints are routed correctly.

User Story 23

As a system administrator, I want to maintain secure records of all complaints and system activities, **so that** important information is protected and available for future reference.

User Story 24

As a system administrator, I want to configure notification settings for different complaint events, **so that** users receive timely updates whenever required.
